-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4 & 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Maisch 2,791,148 (newly cited).

Maisch shows a tube 4 having an entrance and/or exit (above point 5), having a smooth transition from the entrance to the central bore, including a straight section and a curved section. Although Maisch does not disclose that this tube may be used as a ball sizer for a paintball gun, it includes all structure claimed and could be used for this purpose with no structural change.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 5, 6, 11, & 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Maisch.

Maisch shows the entrance having a curved section, but it is not clear if this is a section of a parabola, or a circle. However, it would be considered within the skill in this art to experiment with various curves to determine which works most efficiently; one may find that a parabolic curve or circular curve will allow material to move most efficiently through the tube.
